

Repeatable performance for repeatable results

Features

- Precision adjustment collar with repeatable settings
- Uses interchangeable heads for crimping and decapping
- Use for cap styles such as single piece, "flip" types, spray pumps, as well as the tougher magnetic alloy caps, and many others
- Head sizes range from 7.5mm to 43mm
- Solid construction with CNC precision throughout
- Levered cam design allows for easy operation
- Comfort grip levers
- Adjustable height and lever position for optimum ergonomics

Benefits

- Over 50 head styles kept in stock
- One unit can be used with over 100 different sizes and styles of caps
- Quick and easy set-up and change over when working with multiple sizes and styles of caps
- Recycling facilitated by separating cap from glass
- Durable enough for heavy use
- Dependable performance
- Repeatable settings
- Simple operation
- Low cost
